

Who's BUTT is that?!

If someone doesn't pick up cigarette butts, nasty things happen.

Did you know:

* **Cigarette butts contain 4,000 harmful chemicals, and can take *decades* to break down.** And as they break down, they release the trapped nicotine, which is then flushed into White River and other streams when it rains.

* **The nicotine trapped in 200 used filters is enough to kill an adult human – 50 to 60 milligrams!** Imagine what it does to the wildlife whose lives depend on our streams!

* **Cigarette butts are litter too.**

Littering is wrong and it is illegal.

Litter harms people, animals, the places animals live, and our economy. All of society has to pay the price of the people who litter.

Get Involved. Butt Out!!
